Projektu veidi

The following activities are generally eligible for grants under Horizon Europe:

Research and innovation actions (RIA) — Activities that aim primarily to establish new knowledge or to explore the feasibility of a new or improved technology, product, process, service or solution. This may include basic and applied research, technology development and integration, testing, demonstration and validation of a small-scale prototype in a laboratory or simulated environment.

Innovation actions (IA) — Activities that aim directly to produce plans and arrangements or designs for new, altered or improved products, processes or services. These activities may include prototyping, testing, demonstrating, piloting, large-scale product validation and market replication.

Coordination and support actions (CSA) — Activities that contribute to the objectives of Horizon Europe. This excludes R&I activities, except those carried out under the 'Widening participation and spreading excellence' component of the programme (part of 'Widening participation and strengthening the European Research Area'). Also eligible are bottom-up coordination actions which promote cooperation between legal entities from Member States and Associated Countries to strengthen the European Research Area, and which receive no EU co-funding for research activities.

Programme co-fund actions (CoFund) — A programme of activities established or implemented by legal entities managing or funding R&I programmes, other than EU funding bodies. Such a programme of activities may support: networking and coordination; research; innovation; pilot actions; innovation and market deployment; training and mobility; awareness raising and communication; and dissemination and exploitation. It may also provide any relevant financial support, such as grants, prizes and procurement, as well as Horizon Europe blended finance¹³ or a combination thereof. The actions may be implemented by the beneficiaries directly or by providing financial support to third parties.

Innovation and market deployment actions (IMDA) — Activities that embed an innovation action and other activities necessary to deploy an innovation on the market. This includes the scaling-up of companies and Horizon Europe blended finance.

Training and mobility actions (TMA) — Activities that aim to improve the skills, knowledge and career prospects of researchers, based on mobility between countries and, if relevant, between sectors or disciplines.

Pre-commercial procurement actions (PCP) — Activities that aim to help a transnational buyers' group to strengthen the public procurement of research, development, validation and, possibly, the first deployment of new solutions that can significantly improve quality and

Public procurement of innovative solutions actions (PPI) — Activities that aim to strengthen the ability of a transnational buyers' group to deploy innovative solutions early by overcoming the fragmentation of demand for such solutions and sharing the risks and costs of acting as early adopters, while opening market opportunities for industry. Eligible activities include preparing and implementing, under the coordination of a lead procurer, one joint or several coordinated PPI by the buyers' group and additional activities to embed the PPI into a wider set of demand-side activities.

Personnel costs – new calculation

COSTS

- Discontinuation of the different formulas (annual and monthly) and options for productive hours (entailing difficult and error-prone calculations)
- No more 'last closed financial year' rule
- Instead, use of a single corporate daily rate and calendar year approach

Personnel costs

Daily rate

Atlīdzība

Project-based remuneration at a glance

WHAT IS IT?

- ❖ Usual remuneration practices of a legal entity under which a **personnel receives supplementary payments for work in projects**

Example:

an employee who gets a bonus or a new contract with a higher salary level for working in a project.

HOW MUCH CAN BE DECLARED?

- ❖ Actual remuneration costs paid by the legal entity for the time worked by the personnel in the action ('**action daily rate**') **up to** the remuneration that the person **would be paid for work in R&I projects funded by national schemes** ('**national projects daily rate**')

METHODOLOGY?

- ❖ **Compare**

Action daily rate

National Projects
daily rate

- ❖ Take the lower of the two.

* Usually based on:

- either regulatory requirements (such as national law or collective labour agreements)
- or your written internal remuneration rules

Materiālu izmaksas – prototipu veidošanai

Equipment costs

Continuity

Depreciation costs are **by default** eligible.

By exception, full costs may be eligible.

Further clarity

Optional provisions addressing the specific case of **assets under construction (e.g. prototype)** and their related capitalised costs:

- The **full construction costs** (typically the costs of the personnel involved in the construction of the prototype)
- The **full purchase costs** (typically any component, pieces of equipment bought for the prototype)

Netiešās izmaksas

Indirect costs

COSTS

What? Costs that are only indirectly linked to the action implementation
(Art. 6(1) General eligibility conditions of the Horizon Europe MGA)

continuity

Flat-rate of 25% of the eligible direct costs, except subcontracting costs, financial support to third parties and exempted specific cost categories, if any.
(Art. 6(2)(E) Indirect costs of the Horizon Europe MGA)

NEW

Possibility to accept actual indirect costs allocated via beneficiary's usual key drivers in the unit cost calculation for **internally invoiced goods and services**

Valsts izglītības

Audita sertifikāts pie projekta

Certificate on financial statements (CFS)

COSTS

ALIGNMENT WITH CORPORATE APPROACH

HIGHER THRESHOLD

- **EUR 430 000**
(increased from EUR 325 000 in H2020)
- CFS to be submitted at **payment of the balance**

SIMPLER CALCULATION BASE

- **Requested EU contribution**
calculated on all costs (not only actual costs and unit costs calculated in accordance with usual costs accounting practices as in H2020)

LESS CFS FOR LOW-RISK BENEFICIARIES WITH SPA

- For **beneficiaries with a low-risk classification** after a **SPA** the threshold will increase to **EUR 725 000** (from EUR 430 000)

What can participants do?

- Should be advised that the European Commission will never ask users to submit financial information via an email
- Approach messages sent through the Portal with the same prudence as one would approach regular emails, especially when it comes to attachments and hyperlinks
- The link of the F&T Portal is <https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/home>
- When contacting other organisations yourself, do not send out generic messages but be as specific and concrete as possible.
