STUDY IN GERMANY

WEBINARS ORGANISED BY THE GERMAN ACADEMIC EXCHANGE SERVICE (DAAD)

Germany provides more than 400 universities and universities of applied sciences, which offer more than 18.000 accredited degree courses (many also in English). Therewith Germany is one of the most diverse locations regarding universities worldwide. Financial costs for studying are quite moderate whereas the quality of education and facilities is very high.

The German Academic Exchange Service (DAAD) in the Baltic States is organizing this webinar about study and scholarship opportunities in Germany. Questions like *How will I be able to find a university that suits my interests and demands?* or *How can I finance my studies?* will be answered in online presentations and chats. Each webinar will be held in collaboration with German universities who will present a selection of their study programmes in online presentations.

Tuesday, 1 March 2016, 12 pm EET

Dr. Markus Häfner, DAAD Riga

"Study in Germany"
